

Talking about Risk, Uncertainties of Testing IN Genetics

Designed by Professors Lesley Fallowfield & Valerie Jenkins

There are calls to offer genetic testing to all patients with breast cancer. Many cancer clinicians and nurses are not experienced in genetic testing and many genetic counsellors are not experienced in oncology. All HCPs nevertheless may be faced with challenging communication about genetic risk with patients and their relatives. The TRUSTING educational programme aims to help all HCPs with these difficult conversations.

These residential workshops last 8 hrs split over 2 half days and attract CPD points

- Workshops are facilitator-led, interactive, with didactic presentations, group exercises & discussions
- Are suitable for HCPs or breast cancer teams who discuss genetic testing &/or results

TRUSTING 2025 Dates and Locations

February 2025, Thursday 6th - Friday 7th	London
February 2025, Tuesday 11th - Wednesday 12th	Cardiff
February 2025, Thursday 27th - Friday 28th	Leeds
March 2025, Thursday 13th - Friday 14th	Liverpool
March 2025, Tuesday 18th - Wednesday 19th	Bristol

The TRUSTING workshops, including dinner and accommodation are free to delegates. Please note that travel expenses will not be covered.

To secure a spot, delegates are required to pay a £100 deposit on registration. This will be returned following attendance to the whole workshop, including completion of all questionnaires.

Please note that if you have attended a previous TRUSTING course, you will not be eligible to enroll again. However, a one-day refresher course will be available. For more information, please use the contact below.
